**To Whom It May Concern:**

Beginning on the afternoon of Friday, September 22<sup>nd</sup>, Chevron Phillips (CPChem) will begin the process of starting up Ethylene Unit 33. The unit was brought down for necessary maintenance activities and over the next three to four days will be conducting startup procedures. The flare system will be utilized and there will be intermittent periods of noise, some smoke and a visible flame. At times it is possible that the smoke and noise could last for several hours. Currently, the heaviest period of activity is expected to occur Sunday afternoon or Monday morning. Minimal flaring is expected a couple of days before. Every effort will be made to minimize the impact of our activities. If you have any questions, please call the CAER hotline at (979) 491-2237 from 7:30 AM to 5:00 PM Monday through Friday. After this time and on weekends, please call our Main Gate at (979) 491-2200.
