

Sweeny Implements MyGov Service

New Online Service to Streamline Permits, Inspections, Public Works, Code Enforcement

SWEENY, TEXAS: The leadership at the City of Sweeny, TX have selected MyGov to provide software for the Community Development and Public Works departments. Launched in 2003, MyGov is a leading provider of hosted, web-based Community Development software to government agencies, currently servicing municipal, county and school sectors. MyGov software will assist the City of Sweeny in its goal to provide excellent customer service through increased access, responsiveness and efficiency. The MyGov solution assists the City of Sweeny by improving internal processes, transparency, accountability and data management. MyGov is a hosted solution allowing the City of Sweeny to take advantage of a system that is mobile, affordable and does not require specialized technical staff to maintain and support.

MyGov is providing to the City of Sweeny a suite of integrated products that include: Permits and Inspections, License and Registration, Code Enforcement, Public Works, Request Tracker, and GIS Mapping. The decision to implement MyGov will allow the City of Sweeny the opportunity to work online with applicants, contractors and citizens for greater internal efficiency and increased customer service.

The Permits and Inspections department will now be able to do the following actions online: register and renew contractor registrations, receive permit applications, conduct plans review, receive payments, issue permits, receive inspection requests, and result inspections. To register as a contractor with the City of Sweeny, please click on the link below and follow the instructions.

The Code Enforcement department will now be able to receive online submittal for reporting potential violations such as Tall Grass, Trash & Debris and Illegal Parking. The MyGov Code Enforcement module will allow the City of Sweeny to properly enforce the adopted ordinances and protect the safety and health of the citizens. To report an issue, click the following link and follow the instructions.

The Public Works department will now be able to receive online submittal for reporting potential infrastructure concerns such as Potholes or Water Leaks. The MyGov Public Works module will allow the City of Sweeny to accept and evaluate service requests, schedule work-orders and record resource utilization. To report an issue to Public Works, please click the following link and follow the instructions.

The City of Sweeny has also implemented MyGov GIS (Geographic Information System) into the above mentioned applications. GIS technology will allow system users to import and create maps, identify and select features from developed maps, and then use this information for conducting daily activities. To access the Public GIS option, please click the following link to use the online mapping tools.
